

Lead-to-cash CRM for a focused sales and delivery team.

eCRM connects sales intake, opportunity tracking, commercial proposals, order booking, production status, finance visibility, and management reporting in one professional workspace.

- Single-company CRM
- Admin and Sales roles
- INR and GST-ready
- Laptop-first, web responsive

What the application covers

- CRM core**
Leads/customers, branches, contacts, activities, ownership, reassignment, and CSV import.
- My Day**
Daily sales planning, completed-work visibility, voice notes, transcripts, suggested actions, insights, and end-of-day review.
- Pipeline**
Configurable opportunity stages, owner splits, target tracking, and follow-up driven pipeline views.
- Proposals**
Product-backed commercial summaries, GST line totals, proposal statuses, and external document or Canva links.
- Orders**
Accepted proposal to booked order conversion with PO metadata and preserved commercial snapshots.
- Production**
Order-line work items, editable production templates, stage status updates, notes, owners, and due dates.
- Finance**
Invoice, payment, cost, gross margin, incentive, split, and approval data model with order-level summaries.
- Reports**
Read-only dashboard and reports for billings, pipeline, collections, production, clients, and products.

Business benefits

- Cleaner sales execution**
Separate manual lead entry, CSV import, opportunity management, proposal tracking, and daily planning keep work organized.
- Less handoff ambiguity**
Accepted proposals become booked orders with commercial snapshots before production work starts.
- Better management visibility**
Dashboards and reports summarize pipeline, billings, collections, top clients, products, and production progress.

Workflow proof points

1. Capture demand

Leads, branches, contacts, activities, owners, and CSV import.

2. Manage pursuit

Opportunity stage, value, product interest, owner splits, targets, and follow-ups.

3. Propose

Commercial summary, product/service lines, GST totals, status, and document links.

4. Book order

Accepted proposal to order with preserved totals and PO context.

5. Deliver

Production templates, work items, stages, notes, assignments, and due dates.

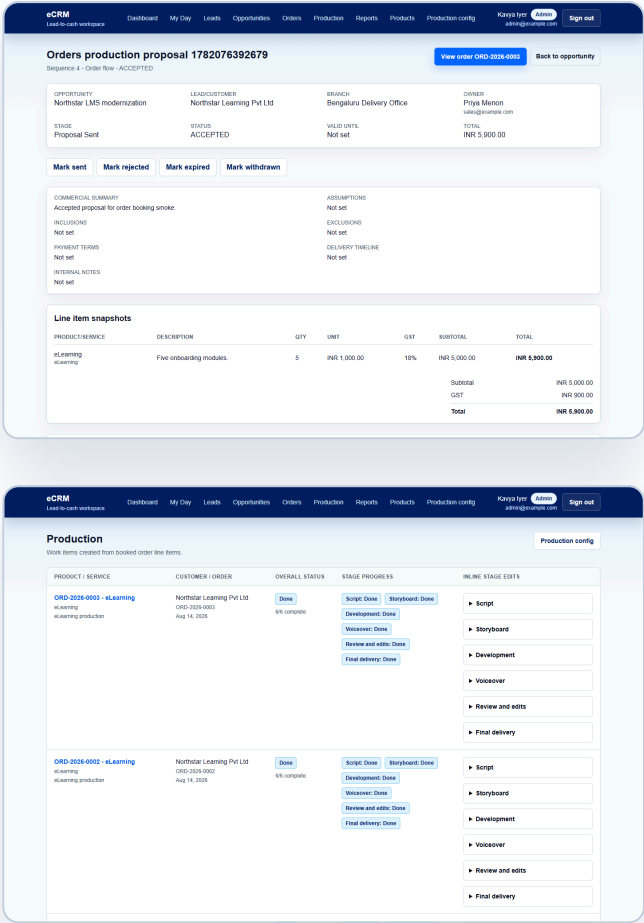

6. Report

Billings, collections, pipeline, top clients/products, production, and follow-ups.

Included catalog defaults

Product/service	GST	Template	Default workflow
eLearning	18%	eLearning production	Script, storyboard, development, voiceover, review, final delivery
Video shoot	18%	Video shoot production	Script, pre-production, shoot, edit, review, final delivery
VR/AR	18%	VR/AR production	Discovery, experience design, development, testing, review, final delivery
Animation	18%	Animation production	Script, storyboard, modeling and animation, voiceover, review, final delivery
Other service	18%	No default template	Flexible service category for unmapped work

Screen evidence

Good fit for

Small B2B sales teams

Company-wide visibility and simple ownership without heavy territory permissions.

Service delivery businesses

Products/services map to delivery templates, making order handoff more predictable.

Founder-led operations

Admin users get catalog, production configuration, finance visibility, and reports in one place.

Current MVP boundaries: proposals link to external documents; invoice PDF generation, native mobile apps, multi-tenant signup, and external accounting integrations are outside the current scope.
