

USER GUIDE

eCRM Lead-to-Cash Workspace

Practical guide for Admin and Sales users covering sign-in, daily planning, leads, opportunities, proposals, orders, production, finance visibility, reports, and configuration.

1. Getting Started

eCRM is a single-company CRM. Admin and Sales users both see company-wide operating data. Ownership is used for responsibility, filtering, targets, and incentives; it is not used to hide records from other sales users.

Local seeded users: Admin is admin@example.com / Admin@12345. Sales is sales@example.com / Sales@12345.

ARA GLOBAL ECRM

Lead-to-cash workspace for training, safety, software, and content delivery.

Track leads, proposals, booked orders, production stages, invoices, collections, and sales follow-ups in one operating view for ARA Global teams.

Sales pipeline
Leads, opportunities, proposals, and daily sales work.

Delivery control
Order booking, production stages, owners, and due dates.

Finance visibility
Invoices, collections, margins, and incentive readiness.

3. Plan Sales Work In My Day

My Day is a personal workspace for planning sales work without automatically changing CRM records.

Create a task

1. Open **My Day**.
2. Select Today.
3. Use the task composer to enter the task, type, priority, due date, and optional linked record.
4. Save the task.

Capture a voice note

1. Open My Day.
2. Use **Record voice note**.
3. Attach it to a task if needed.
4. Review playback, transcript, and suggested follow-up actions when available.

Use insights and end-of-day review

Insights suggest tomorrow planning, accounts needing attention, voice-note summaries, and unfinished work. End-of-day review helps move or close work intentionally.

PERSONAL SALES WORKSPACE

My Day

Plan sales work, keep completed items visible, and capture call notes without changing CRM records automatically.

Northstar LMS modernization Northstar Learning Pvt Ltd LEAD Bengaluru Delivery Office LMS modernization and onboarding content	Proposal Sent OPEN	Priya Menon sales@example.com	INR 12,50,000.00 60%	20 Jun 2026 Updated 21 Jun 2026	Priya Menon 100%

Create and manage a proposal

1. Open an opportunity.
2. Use the proposal area to create a new proposal.
3. Add commercial summary, assumptions, inclusions, exclusions, payment terms, delivery timeline, and line items.
4. Use product/service catalog items so GST defaults and snapshots are stored consistently.
5. Add proposal document links for external PDFs and optional Canva designs.
6. Move the proposal through status actions such as sent, accepted, rejected, expired, or withdrawn.

7. Products, Production Templates, And Finance Visibility

Product and service catalog

Admin users manage the product/service catalog. Sales users use active catalog rows when creating proposal line items.

eCRM
Lead-to-cash workspace

DashboardMy DayLeadsOpportunitiesOrdersProductionReportsProductsProduction config

Kavya IyerAdmin
admin@example.comSign out

Products and services

New product/service

Admin catalog defaults for proposal line items.

PRODUCT/SERVICE	CODE	CATEGORY	GST	TEMPLATE	STATUS	ACTIONS
eLearning Sort 10	ELEARNING	eLearning	18%	elearning	Active	Deactivate eLearning
Video shoot Sort 20	VIDEO-SHOOT	Video shoot	18%	video_shoot	Active	Deactivate Video shoot
VR/AR Sort 30	VR-AR	VR/AR	18%	vr_ar	Active	Deactivate VR/AR
Animation Sort 40	ANIMATION	Animation	18%	animation	Active	Deactivate Animation
Other service Sort 50	OTHER-SERVICE	Other service	18%	No template	Active	Deactivate Other service

Production configuration

Admin users can manage production templates, template stages, durations, required flags, active status, and product/service mappings.

Finance visibility

Finance data is attached to orders. The model supports invoice records, payments, payment allocations, cost components, gross margin, incentives, split recipients, approval status, overrides, rejection, voiding, and payout metadata. Invoice PDF generation and external accounting sync are not part of the current MVP.

8. Roles, Rules, And Current Boundaries

Admin can

- View and edit company data.
- Manage products and services.
- Manage production templates and mappings.
- Enter finance records and approve or override incentives.
- Use reports and all operational routes.

Sales can

- View company-wide CRM, pipeline, proposal, order, payment, production, and report data.
- Create and update normal sales records.
- Plan My Day tasks and voice notes.
- Create proposals and add document links where permitted.

Current MVP boundaries

- The app is single-company, not multi-tenant.
- Proposal documents are external links or uploaded metadata; the CRM does not replace Canva.
- Invoice PDF generation is out of scope.
- Native mobile apps, Microsoft/Google login, email sync, and accounting integrations are out of scope.
- Finance and Operations are workflow modules in the MVP, not separate user roles.
