

Run sales, delivery, and cash flow as one operating rhythm.

eCRM connects daily selling, commercial control, order handoff, production progress, finance visibility, and management reporting in one focused workspace.

8

Connected operational modules

2

Simple roles: Admin and Sales

5

Seeded service categories

4

Production workflow templates

Fragmented handoffs hide work, delay cash, and blur ownership.

When work is scattered

- Lead context and follow-ups drift apart
- Proposal history becomes manual
- Booked terms are re-keyed for delivery
- Collections and margin appear too late

When the lifecycle is connected

- One customer context follows every pursuit
- Commercial snapshots survive handoff
- Production work stays stage-visible
- Management sees pipeline to cash

One lifecycle. Seven visible control points.

Dashboard

Signed in as Kavya Iyer. Live company-wide sales, billing, collection, production, and follow-up metrics.

Open opportunities 1 Opportunities in open stages	Pipeline value INR 12,50,000.00 Open estimated value	Booked value excl. GST INR 15,000.00 Excludes GST
Pending receivables INR 17,700.00 Outstanding against order totals	Collected payments INR 0.00 Actual payment records	Production pending 0 Work not done or skipped

Management dashboardLive local seed/demo data

Eight modules built around the same operating context.

Design principle: ownership supports responsibility, filtering, targets, and incentives; it does not hide company records from other Sales users.

Turn a day of activity into deliberate, visible work.

- 01

Plan
Prioritize today, upcoming, overdue, and follow-up work.
- 02

Capture
Record tasks, call notes, voice notes, and linked account context.
- 03

Interpret
Review transcript-driven suggestions and attention signals.
- 04

Close the loop
Complete, carry forward, or intentionally re-plan unfinished work.

Proposal detail

Terms, lines, GST, status, and document links

Proposal

Capture assumptions, inclusions, exclusions, payment terms, timeline, and catalog-backed line items.

Acceptance

Use explicit status actions so the commercial state remains visible and auditable.

Order

Book once from the accepted proposal and preserve totals, customer, owner, lines, and PO context.

ARA Global eCRM · Product overview

06

Make post-sale progress as visible as the pipeline.

Template-driven start

Products and services map to reusable production templates.

Stage-level ownership

Each work item carries status, assignment, due date, notes, and completion data.

Order-line traceability

Delivery work remains connected to its customer, order, and commercial snapshot.

Management scan

The board highlights what is active, complete, skipped, blocked, assigned, or due.

Production board

Work organized by booked order and service line

Seeded for INR, GST, service delivery, and margin visibility.

Product/service	GST	Template	Default workflow
eLearning	18%	eLearning production	Script → storyboard → development → voiceover → review → delivery
Video shoot	18%	Video shoot production	Script → pre-production → shoot → edit → review → delivery
VR/AR	18%	VR/AR production	Discovery → experience design → development → testing → review → delivery
Animation	18%	Animation production	Script → storyboard → modeling → animation → voiceover → review → delivery
Other service	18%	No default template	Flexible service category for unmapped work

Integer-paise commercial snapshots

Default GST stored as basis points

Default incentive on gross margin

Company-wide operating visibility

Open opportunities, pipeline value, top clients, and product interest.

Booked value excluding GST, recent orders, billings, and collections.

Production pending, upcoming follow-ups, and delivery context.

Order-level invoice, payment, cost, gross-margin, and incentive records.

FOCUSED OPERATING DISCIPLINE

Give a growing sales and delivery team one place to run the work.

A practical fit for small B2B sales teams, service-delivery businesses, and founder-led operations that need connected execution without enterprise CRM weight.

Cleaner execution

Daily work, calls, notes, follow-ups, and account context stay connected.

Controlled handoffs

Accepted commercial terms carry into orders before delivery work begins.

Visible economics

Billings, collections, costs, margin, incentives, and progress share one view.
