

Operate the complete lead-to-cash workspace with confidence.

A practical, screen-led guide to daily planning, customer context, opportunities, proposals, orders, production, finance visibility, reports, and configuration.

How to use this guide

Follow the lifecycle for end-to-end work, or jump directly to the chapter that matches your task. Each screen is current local product evidence; sample records are seed/demo data.

Role map

■ Admin

- All commercial and operational routes
- Catalog and production configuration
- Finance records and incentive controls
- Company-wide reporting

■ Sales

- Company-wide CRM and pipeline context
- My Day planning and voice notes
- Opportunities, proposals, and orders
- Production, payment, and report visibility

No separate Manager role: managers who need configuration and financial controls use Admin; managers who only need commercial execution can use Sales.

Getting started

eCRM is a single-company CRM. Admin and Sales users see company-wide operating data. Ownership is used for responsibility, filtering, targets, and incentives—not to hide records from other Sales users.

Local development/demo access only: Use the Admin or Sales account assigned for the current environment. Credentials are environment-specific and are not published in this guide.

SECURE CUSTOMER-CELL WORKSPACE

Lead-to-cash workspace for training, safety, software, and content delivery.

Track leads, proposals, booked orders, production stages, invoices, collections, and sales follow-ups in one secure operating view for your team.

Sales pipeline
Leads, opportunities, proposals, and daily sales work.

Delivery control
Order booking, production stages, owners, and due dates.

Finance visibility
Invoices, collections, margins, and incentive readiness.

Voice notes

My Day workspace

Today, upcoming, overdue, and completed work

- CREATE A TASK

1. Open **My Day** and select Today.

2. Enter the task, type, priority, due date, and optional linked record.

3. Save and verify it appears in the intended time band.
- CAPTURE A VOICE NOTE

1. Select **Record voice note**.

2. Attach it to a task when useful.

3. Review playback, transcript, and suggested follow-up actions when available.

Close the day intentionally

Use insights to review accounts needing attention, voice-note summaries, tomorrow planning, and unfinished work. Complete, carry forward, or re-plan rather than letting work disappear.

Branches, contacts, activity, ownership, and pursuits

Opportunity pipeline

Stage, value, product interest, owner, and follow-up

1. Open an opportunity.
2. Create a proposal from its proposal area.
3. Add commercial summary, assumptions, inclusions, exclusions, payment terms, and timeline.

1. Add catalog-backed line items.
2. Attach external PDF or optional Canva links.
3. Move through sent, accepted, rejected, expired, or withdrawn states.

Proposal detail

Terms, GST snapshots, status, and document links

Orders are created from accepted proposals and preserve customer, owner, line items, GST totals, PO metadata, and source-proposal context.

Accepted work ready for delivery control

BOOK THE ORDER

1. Open the accepted proposal.
2. Choose **Book order** or open the existing order link.
3. Enter PO metadata and due dates.
4. Verify the commercial snapshot.

RUN PRODUCTION

1. Open **Production**.
2. Open stage controls or a work-item detail.
3. Update status, owner, due date, notes, completion, or skipped reason.
4. Scan progress by customer and order.

Commercial and finance snapshot

Stage-level delivery progress

Product/service catalog

Active catalog rows and defaults

Sales: use active catalog rows when building proposal lines so GST and commercial snapshots stay consistent.

Production configuration

Templates, stages, durations, and mappings

Admin: manage template stages, duration, required flags, active state, and product/service mappings.

Finance visibility on orders

The order model supports invoice records, payments and allocations, cost components, gross margin, incentives, split recipients, approval status, overrides, rejection, voiding, and payout metadata.

Product/service	GST	Template	Default workflow
eLearning	18%	eLearning production	Script → storyboard → development → voiceover → review → delivery
Video shoot	18%	Video shoot production	Script → pre-production → shoot → edit → review → delivery
VR/AR	18%	VR/AR production	Discovery → experience design → development → testing → review → delivery
Animation	18%	Animation production	Script → storyboard → modeling → animation → voiceover → review → delivery
Other service	18%	No default template	Flexible service category for unmapped work

Boundary: invoice PDF generation and external accounting synchronization are not part of the current MVP.

Use this page as the operating contract for the current MVP.

Role permissions

Admin

- All commercial and operational routes
- Catalog and production configuration
- Finance records and incentive controls
- Company-wide reporting

Sales

- Company-wide CRM and pipeline context
- My Day planning and voice notes
- Opportunities, proposals, and orders
- Production, payment, and report visibility

Current product boundaries

- 01

Single-company workspace
This build is not a browser-selectable multi-tenant CRM.
- 02

External proposal documents
eCRM links document metadata and optional Canva designs; it does not replace a document editor.
- 03

Finance workflow, not accounting sync
Invoice, payment, cost, margin, and incentive records are supported; invoice PDF and accounting integrations are outside scope.
- 04

Web application
Native mobile apps, Microsoft/Google login, and email sync are outside the current MVP.
- 05

Two application roles
Finance and Operations are workflow modules—not separate user roles.

The operating promise

Every handoff stays visible: who owns it, what was agreed, what is due, what has been delivered, and what has been collected.

Cleaner execution
Daily work, calls, notes, follow-ups, and account context stay connected.

Controlled handoffs
Accepted commercial terms carry into orders before delivery work begins.

Visible economics
Billings, collections, costs, margin, incentives, and progress share one view.
